

REGULAR PAPERS

Dynamic Control Allocation Algorithm for a Class of Distributed Control Systems

D.-F. Zhang, S.-P. Zhang, Z.-Q. Wang, and B.-C. Lu 259

Distributed Control for Signed Networks of Nonlinear Agents

M. Du, B. Ma, and D. Meng 271

Robust Output Feedback Consensus of High-order Multi-agent Systems with Nonlinear Uncertainties

Y. Yu, N. Li, L. Sun, J. Liu, and C. Sun 282

Dynamic Event-triggered Control for Heterogeneous Leader-following Consensus of Multi-agent Systems Based on Input-to-state Stability

X. Li, D. Ma, X. Hu, and Q. Sun 293

On Bipartite Consensus of Bounded Confidence Models for Opinion Dynamics

G. He, J. Liu, Y. Wu, and J.-A. Fang 303

Cooperative Containment Formation for Discrete-time Heterogeneous Networks by Double Compensators

Y. Zhou, P. Li, T. Cai, and H. Liang 313

Error Improvement in Visual Odometry Using Super-resolution

W. Jeong, J. Moon, and B. Lee 322

Unbiased FIR Filtering with Incomplete Measurement Information

D. K. Ryu, C. J. Lee, S. K. Park, and M. T. Lim 330

Double Closed-loop Integral Terminal Sliding Mode for a Class of Underactuated Systems Based on Sliding Mode Observer

W. Liu, S. Chen, and H. Huang 339

Sliding Mode Boundary Control for a Planar Two-link Rigid-flexible Manipulator with Input Disturbances

F. Han and Y. Jia 351

Sliding Mode Control with Adaptive Fuzzy Immune Feedback Reaching Law

C. Sun, G. Gong, and H. Yang 363

Fractional Order Exponential Type Discrete-time Sliding Mode Control

H. Ma and Y. Li 374

Robust Supervisors for Intersection Collision Avoidance in the Presence of Legacy Vehicles

H. Ahn, A. Rizzi, and A. Colombo 384

Adaptive Anti-saturation Tracking Control with Prescribed Performance for Hypersonic Vehicle

B.-W. Chen and L.-G. Tan 394

Adaptive Fuzzy Output Regulation for Unmanned Surface Vehicles with Prescribed Performance

S. Li, T. Ma, X. Luo, and Z. Yang 405

Finite-time Adaptive Integral Backstepping Fast Terminal Sliding Mode Control Application on Quadrotor UAV

K. Elikar and W. Zhang 415

Asynchronous H_∞ Control for Positive Discrete-time Markovian Jump Systems

H. Shang, W. Qi, and G. Zong 431

Fault Detection Filtering for a Class of Nonhomogeneous Markov Jump Systems with Random Sensor Saturations

S. Pan, Z. Ye, and J. Zhou 439

Finite-time Asynchronous H_∞ Filtering Design of Markovian Jump Systems with Randomly Occurred Quantization

Y. Zhu, X. Song, M. Wang, and J. Lu 450

Fixed-time Synchronization of Complex-valued Memristive BAM Neural Network and Applications in Image Encryption and Decryption

Y. Guo, Y. Luo, W. Wang, X. Luo, C. Ge, J. Kurths, M. Yuan, and Y. Gao 462

A Matrix Approach for the Static Correction Problem of Asynchronous Sequential Machines

B. Wang and J. Feng 477

Performance Analysis of Disturbance Estimation Techniques for Robust Position Control of DC Motor

S. S. Sankeshwari and R. H. Chille 486

Systematic Method of Designing and Constructing Velocity Fields for Motion Control

F. J. Ruiz-Sanchez 495

Recursive Least-squares Estimation for Multivariable Systems Based on the Maximum Likelihood Principle

H. Xia, Y. Yang, and F. Ding 503

Robust Guaranteed Cost Control for a Class of Nonlinear 2-D Systems with Input Saturation

X. Bu, J. Liang, S. Wang, and W. Yu 513

Information for Authors

International Journal of Control, Automation, and Systems

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

(1) *Regular Papers*: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.

(2) *Technical Notes and Correspondence*: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

(1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.

(2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.

(3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

Manuscript Style

(1) First page must contain:

- Title of paper, author(s), and affiliation(s);
- Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
- Keywords (at least four key words or phrases);
- Complete mailing address and e-mail address;
- Preferred address for correspondence and return of proofs; and,
- Footnotes (if desired) containing acknowledgement of financial or other support.

(2) Provide an introduction that includes a statement of the purpose and contribution of the paper.

(3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."

(4) References should appear at the end of the paper. Example: [1] G. D. Hong, "Call for papers," *IEEE Trans. on Automatic Control*, AC-7, no. 1, pp. 100-105, January 1999.

[2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999.

[3] G. D. Hong, "A way to success," *Proc. of American Control Conference*, San Diego, pp. 106-110, June 1999.

Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 1 hard copy of journal only if the reprint charge (USD 100) is honored.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.

CONTACT OFFICE : Institute of Control, Robotics and Systems, Suseo Hyundai-Ventureville 723, Bamgogae-ro 1-gil 10, Gangnam-gu, Seoul 06349, Korea. Tel: +82-2-6949-5806 Fax: +82-2-6949-5807, E-mail: journal@ijcas.com

Published by Institute of Control, Robotics and Systems and the Korean Institute of Electrical Engineers. Distributed by Springer. Printed by Dream Media. This journal is published monthly, on the first day of each month. This journal was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government (Ministry of Education). Subscription information is available at <http://www.ijcas.com> where full-text is available. It is printed on acid-free paper. Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
