

Special Issue on Marine Robotics and Control Systems

Guest Editorial: Marine Robotics and Control Systems

S.-C. Yu, A. M. Pascoal, and J. Kim 521

Realistic Sonar Image Simulation Using Deep Learning for Underwater Object Detection

M. Sung, J. Kim, M. Lee, B. Kim, T. Kim, J. Kim, and S.-C. Yu 523

Development of an Autonomous Surface Vehicle and Performance Evaluation of Autonomous Navigation Technologies

J. Choi, J. Park, J. Jung, Y. Lee, and H.-T. Choi 535

Collaborative Mission and Route Planning of Multi-vehicle Systems for Autonomous Search in Marine Environment

S. Yoon, H. Do, and J. Kim 546

Control Allocation for Double-ended Ferries with Full-scale Experimental Results

T. R. Torben, A. H. Brodtkorb, and A. J. Sørensen 556

Three-dimensional Visual Mapping of Underwater Ship Hull Surface Using Piecewise-planar SLAM

S. Hong and J. Kim 564

Analysis of Electromagnetic Waves Attenuation for Underwater Localization in Structured Environments

D. Park, W. K. Chung, and J. Kim 575

3D Reconstruction Using Two Sonar Devices in a Monte-Carlo Approach for AUV Application

H. Joe, J. Kim, and S.-C. Yu 587

Tracking a Sea Turtle by an AUV with a Multibeam Imaging Sonar: Toward Robotic Observation of Marine Life

T. Maki, H. Horimoto, T. Ishihara, and K. Kofuji 597

Underwater Image Dehazing via Unpaired Image-to-image Translation

Y. Cho, H. Jang, R. Malav, G. Pandey, and A. Kim 605

Adaptive Non-singular Terminal Sliding Mode Control for an Unmanned Underwater Vehicle: Real-time Experiments

M. Angel G. Rangel, A. Manzanilla, A. Eduardo Z. Suarez, F. Muñoz, S. Salazar, and R. Lozano 615

INDEXED IN Science Citation Index Expanded (SciSearch), SCOPUS, INSPEC, Google Scholar, ProQuest, Current Contents/Engineering, Computing and Technology, El-Compendex, Journal Citation Reports/Science Edition, OCLC, Summon by Serial Solutions, Korea Citation Index.

Regular Papers

A Survey on Filtering Issues for Two-Dimensional Systems: Advances and Challenges

F. Wang, Z. Wang, J. Liang, and J. Yang 629

Gaussian Sum FIR Filtering for 2D Target Tracking

J. M. Pak 643

The Auxiliary Model Based Hierarchical Estimation Algorithms for Bilinear Stochastic Systems with Colored Noises

C. Guo, L. Wang, and F. Deng 650

Event-triggered Control for Heterogeneous Discrete-time Multi-agent Systems Subject to Uncertainties and Noises

J. Zhang, D.-W. Ding, Q. Li, and C. An 661

Sampling-based Event-triggered and Self-triggered Control for Linear Systems

J. Chen, Y. Fan, C. Zhang, and C. Song 672

Diagnosability Analysis of Intermittent Faults in Discrete Event Systems Using a Twin-plant Structure

A. Boussif and M. Ghazel 682

Adaptive Synchronization of Time Delay Chaotic Systems with Uncertain and Unknown Parameters via Aperiodically Intermittent Control

Y. Wang, X. Zhang, L. Yang, and H. Huang 696

Stability of Stochastic Functional Differential Systems with Semi-Markovian Switching and Lévy Noise and Its Application

W. Luo, X. Liu, and J. Yang 708

Robust Tracking Control with Preview Action for Uncertain Discrete-time Systems

L. Li, F. Liao, and Z. Ren 719

Quadrotor Flight Controller Design Using Classical Tools

T. Zubowicz, K. Arminski, and A. Kusalewicz 730

Fault-tolerant Compensation Control Based on Sliding Mode Technique of Unmanned Marine Vehicles Subject to Unknown Persistent Ocean Disturbances

L.-Y. Hao, H. Zhang, W. Yue, and H. Li 739

A Constrained Predictive Controller for AUV and Computational Optimization Using Laguerre Functions in Unknown Environments

A. J. Rashidi, B. Karimi, and A. Khodaparast 753

Layered Formation-containment Control of Multi-agent Systems in Constrained Space

D. Li, S. S. Ge, G. Ma, and W. He 768

A New Iterative Least Squares Parameter Estimation Approach for Equation-error Autoregressive Systems

L. Wan, F. Ding, X. Liu, and C. Chen 780

Estimation of Slag Removal Path Using CNN-based Path Probability of Ladle Image Blocks

J.-S. Kim, G.-T. Ahn, and S.-Y. Park 791

Information for Authors

International Journal of Control, Automation, and Systems

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

(1) *Regular Papers*: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.

(2) *Technical Notes and Correspondence*: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

(1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.

(2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.

(3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

Manuscript Style

(1) First page must contain:

- Title of paper, author(s), and affiliation(s);
- Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
- Keywords (at least four key words or phrases);
- Complete mailing address and e-mail address;
- Preferred address for correspondence and return of proofs; and,
- Footnotes (if desired) containing acknowledgement of financial or other support.

(2) Provide an introduction that includes a statement of the purpose and contribution of the paper.

(3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."

(4) References should appear at the end of the paper. Example: [1] G. D. Hong, "Call for papers," *IEEE Trans. on Automatic Control*, AC-7, no. 1, pp. 100-105, January 1999.

[2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999.

[3] G. D. Hong, "A way to success," *Proc. of American Control Conference*, San Diego, pp. 106-110, June 1999.

Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 1 hard copy of journal only if the reprint charge (USD 100) is honored.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.

CONTACT OFFICE : Institute of Control, Robotics and Systems, Suseo Hyundai-Ventureville 723, Bamgogae-ro 1-gil 10, Gangnam-gu, Seoul 06349, Korea. Tel: +82-2-6949-5806 Fax: +82-2-6949-5807, E-mail: journal@ijcas.com

Published by Institute of Control, Robotics and Systems and the Korean Institute of Electrical Engineers. Distributed by Springer. Printed by Dream Media. This journal is published monthly, on the first day of each month. This journal was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government (Ministry of Education). Subscription information is available at <http://www.ijcas.com> where full-text is available. It is printed on acid-free paper. Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
