

REGULAR PAPERS

Control Theory and Applications

The Structure-preserving Doubling Numerical Algorithm of the Continuous Coupled Algebraic Riccati Equation

J. Zhang and S. Li 1641

Model Reference Robust Adaptive Control of Control Element Drive Mechanism in a Nuclear Power Plant

B.-J. Park, P.-T. Pham, and K.-S. Hong 1651

An  $H_\infty$  Design of Disturbance Observer for a Class of Linear Time-invariant Single-input/Single-output Systems

H.-T. Seo, S. Kim, and K.-S. Kim 1662

Robust Integral Sliding Mode Control Design for Stability Enhancement of Under-actuated Quadcopter

S. Ullah, A. Mehmood, Q. Khan, S. Rehman, and J. Iqbal 1671

A Singularity-free Steering Law of Roof Array of Control Moment Gyros for Agile Spacecraft Maneuver

H. Leeghim, C.-Y. Lee, J. Jin, and D. Kim 1679

Moment Matched Gaussian Kernel and Region Representative Likelihood for Performance Improvement of PMF-based TRN

C.-K. Sung and S. J. Lee 1691

Asynchronous Switching Control of Discrete-time Linear System Based on Mode-dependent Average Dwell Time

J. Huang, X. Hao, and X. Pan 1705

An Air Pressure Control Method for Fast and Precise Inspection on Triple Action Pressure Sensors

D.-G. Kim, K.-W. Chung, and K.-S. Hong 1715

Distributed Containment Control of Fractional-order Multi-agent Systems with Double-integrator and Nonconvex Control Input Constraints

X.-L. Yuan, L.-P. Mo, Y.-G. Yu, and G.-J. Ren 1728

Feedback Linearization of Nonlinear Singularly Perturbed Systems with State-dependent Coefficients

A.A. Kabanov 1744

Asynchronously Input-output Finite-time Control of Positive Impulsive Switched Systems

L. Liu, H. Xing, Y. Di, Z. Fu, and S. Song 1751

Design of the PID Controller for Hydro-turbines Based on Optimization Algorithms

J.-W. Perng, Y.-C. Kuo, K.-C. Lu 1758

Barrier Lyapunov Function Based Adaptive Cross Backstepping Control for Nonlinear Systems with Time-varying Partial State Constraints

C. Wang, L. Qi, J. Liu, and J. Yu 1771

Robot and Applications

Mechanism Design of a Robotic Leg for Running Considering Radial Force Producibility and Tangential Mobility

J. Cho and K. Kong 1782

Intuitive Bilateral Teleoperation of a Cable-driven Parallel Robot Controlled by a Cable-driven Parallel Robot

H. Choi, J. Piao, E.-S. Kim, J. Jung, E. Choi, J.-O. Park, and C.-S. Kim 1792

A Nonlinear Model-based Variable Impedance Parameters Control for Position-based Impedance Control System of Hydraulic Drive Unit

K. Ba, G. Ma, B. Yu, Z. Jin, Z. Huang, J. Zhang, and X. Kong 1806

On-line Self Tuning of Contouring Control for High Accuracy Robot Manipulators under Various Operations

K. Li, S. Boonto, and T. Nuchkrua 1818

Lyapunov Self-triggered Controller for Nonlinear Trajectory Tracking of Unicycle-type Robot

C. Santos, F. Espinosa, E. Santiso, and D. Gualda 1829

Variable Impedance Control of Cable Actuated Continuum Manipulators

G. He, Y. Fan, T. Su, L. Zhao, and Q. Zhao 1839

Intelligent Control and Applications

Improved Results on Stability Analysis for Delayed Neural Network

J.-A. Wang, L. Fan, and X.-Y. Wen 1853

A Neural Network Technique of Compensating for an Inertia Model Error in a Time-delayed Controller for Robot Manipulators

S. Jung 1863

Stability Analysis and Robust  $H_\infty$  Controller Synthesis with Derivatives of Membership Functions for TS Fuzzy Systems with Time-varying Delay: Input-output Stability Approach

R. Chaibi, H. E. Aiss, A. E. Hajjaji, and A. Hmamed 1872

Leaderless Consensus of Non-linear Mixed delay Multi-agent Systems with Random Packet Losses via Sampled-data Control

M. S. Ali, R. Agalya, S. Saroha, and T. Saeed 1885

Exponential Stabilization of Delayed Complex-valued Neural Networks with Aperiodic Sampling: A Free-matrix-based Time-dependent Lyapunov Functional Method

L. Yao, Z. Wang, Q. Wang, J. Xia, and H. Shen 1894

Non-fragile Suboptimal Set-membership Estimation for Delayed Memristive Neural Networks with Quantization via Maximum-error-first Protocol

Y. Yang, J. Hu, D. Chen, Y. Wei, and J. Du 1904

Published by Institute of Control, Robotics and Systems and the Korean Institute of Electrical Engineers. Distributed by Springer. Printed by Dream Media.  This journal is published monthly, on the first day of each month.  This journal was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government (Ministry of Education).  Subscription information is available at <http://www.ijcas.com> where full-text is available.  It is printed on acid-free paper.  Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.

# Information for Authors

International Journal of Control, Automation, and Systems

#### Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

(1) *Regular Papers*: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.

(2) *Technical Notes and Correspondence*: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

#### Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

#### Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

#### Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

#### Manuscript Preparation

(1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.

(2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.

(3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

#### Manuscript Style

(1) First page must contain:

- Title of paper, author(s), and affiliation(s);
- Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
- Keywords (at least four key words or phrases);
- Complete mailing address and e-mail address;
- Preferred address for correspondence and return of proofs; and,
- Footnotes (if desired) containing acknowledgement of financial or other support.

(2) Provide an introduction that includes a statement of the purpose and contribution of the paper.

(3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."

(4) References should appear at the end of the paper. Example: [1] G. D. Hong, "Call for papers," *IEEE Trans. on Automatic Control*, AC-7, no. 1, pp. 100-105, January 1999.

[2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999.

[3] G. D. Hong, "A way to success," *Proc. of American Control Conference*, San Diego, pp. 106-110, June 1999.

#### Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

#### Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 1 hard copy of journal only if the reprint charge (USD 100) is honored.

#### Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.
