

REGULAR PAPERS

Control Theory and Applications

Novel Nonlinear Backstepping Control of Synchronous Reluctance Motor Drive System for Position Tracking of Periodic Reference Inputs with Torque Ripple Consideration

C.-H. Lin and J.-C. Ting 1

Active Disturbance Rejection Control of the Inertia Wheel Pendulum through a Tangent Linearization Approach

M. Ramírez-Neria, H. Sira-Ramírez, R. Garrido-Moctezuma, and A. Luviano-Juárez 18

Decentralized Adaptive Control of Interconnected Nonlinear Systems with Unknown Control Directions and Actuator Failure

G. Xu, J. Huang, and X. Su 29

The Direct Feedback Control and Exponential Stabilization of a Coupled Heat PDE-ODE System with Dirichlet Boundary Interconnection

D.-X. Zhao, J.-M. Wang, and Y.-P. Guo 38

Sampled-data Robust H_∞ Control for TS Fuzzy Time-delay Systems with State Quantization

X. Han and Y. Ma 46

Allocating Minimum Number of Leaders for Seeking Consensus over Directed Networks with Time-varying Nonlinear Multi-agents

L. Gao, G. Zhao, G. Li, Y. Liu, J. Huang, and C. Wen 57

Parametric Fault Diagnosis of an Active Gas Bearing

A. Sekunda, H. Niemann, N. K. Poulsen, and I. Santos 69

Consensus of Second-order Multi-agent Systems with Directed Networks Using Relative Position Measurements Only

S. Cheng, H. Dong, L. Yu, D. Zhang, and J. Ji 85

Observer-based Composite Adaptive Dynamic Terminal Sliding-mode Controller for Nonlinear Uncertain SISO Systems

X. Liu, S. Qi, R. Malekain, and Z. Li 94

Vibration Reduction for Offshore Platforms via Delayed Sliding Mode H_∞ Control

B.-L. Zhang, X. Jiang, Q. Wu, and G.-Y. Tang 107

A New Observer Design for Systems in Presence of Time-varying Delayed Output Measurements

B. Targui, O. Hernández-González, C.-M. Astorga-Zaragoza, G.-V. Guerrero-Ramírez, and M.-E. Guerrero-Sánchez 117

Improved Cascade Control System for a Class of Unstable Processes with Time Delay

C.-q. Yin, H. Wang, Q. Sun, and L. Zhao 126

Consensus of the Second-order Multi-agent Systems under Asynchronous Switching with a Controller Fault

D. Zheng, H. Zhang, J. A. Zhang, and Y. Li 136

Friction Characteristics of a Cylinder Based on a Bridge-Type Pneumatic Energy-saving Circuit

H. Du, W. Xiong, Z. Jiang, Q. Li, and L. Wang 145

Robot and Applications

Design and Experimental Validation of a Robust Output Feedback Control for the Coupled Dynamics of a Micro Air Vehicle

K. Harikumar, S. Dhall, and M. S. Bhat 155

Evaluation of Haptic Feedback in the Performance of a Teleoperated Unmanned Ground Vehicle in an Obstacle Avoidance Scenario

C. Ju and H. I. Son 168

Vehicle Reference Generator for Collision-free Paths

T. Kabbani, C. A. Lúa, and S. D. Gennaro 181

Path Following Predictive Control for Autonomous Vehicles Subject to Uncertain Tire-ground Adhesion and Varied Road Curvature

L. Yang, M. Yue, and T. Ma 193

Disturbance Observer-based Trajectory Following Control of Robot Manipulators

M. Homayounzade and A. Khademhosseini 203

Circumnavigation of a Moving Target in 3D by Multi-agent Systems with Collision Avoidance: An Orthogonal Vector Fields-based Approach

H. Zhong, Y. Wang, Z. Miao, J. Tan, L. Li, H. Zhang, and R. Fierro 212

Intelligent Control and Applications

Finite Time Controller Design of Nonlinear Quantized Systems with Nonstrict Feedback Form

X. Zhang, F. Wang, and L. Zhang 225

Dynamic Stability Enhancement Using Fuzzy PID Control Technology for Power System

K. Eltag, M. S. Aslam, and R. Ullah 234

Pinning Impulsive Synchronization of Stochastic Memristor-based Neural Networks with Time-varying Delays

Q. Fu, J. Cai, S. Zhong, and Y. Yu 243

An ANFIS-based Optimized Fuzzy-multilayer Decision Approach for a Mobile Robotic System in Ever-changing Environment

F. Kamil, T. S. Hong, W. Khaksar, N. Zulkifli, and S. A. Ahmad 253

TECHNICAL NOTES AND CORRESPONDENCE

Unknown Input Observer Design for Takagi-Sugeno Systems with Fuzzy Output Equation

J. Li, Z. Wang, Y. Shen, and Y. Liu 267

INDEXED IN Science Citation Index Expanded (SciSearch), SCOPUS, INSPEC, Google Scholar, ProQuest, Current Contents/Engineering, Computing and Technology, EI-Compendex, Journal Citation Reports/Science Edition, OCLC, Summon by Serial Solutions, Korea Citation Index.

CONTACT OFFICE : Institute of Control, Robotics and Systems, Suseo Hyundai-Ventureville 723, Bamgogae-ro 1-gil 10, Gangnam-gu, Seoul 06349, Korea. Tel: +82-2-6949-5806 Fax: +82-2-6949-5807, E-mail: journal@ijcas.com

Published by Institute of Control, Robotics and Systems and the Korean Institute of Electrical Engineers. Distributed by Springer. Printed by Dream Media. This journal is published monthly; on the first day of each month. This journal was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government (Ministry of Education). Subscription information is available at <http://www.ijcas.com> where full-text is available. It is printed on acid-free paper.

Information for Authors

International Journal of Control, Automation, and Systems

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

- (1) *Regular Papers*: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.
- (2) *Technical Notes and Correspondence*: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

- (1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.
- (2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.

(3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

Manuscript Style

- (1) First page must contain:
 - a) Title of paper, author(s), and affiliation(s);
 - b) Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
 - c) Keywords (at least four key words or phrases);
 - d) Complete mailing address and e-mail address;
 - e) Preferred address for correspondence and return of proofs; and,
 - f) Footnotes (if desired) containing acknowledgement of financial or other support.
- (2) Provide an introduction that includes a statement of the purpose and contribution of the paper.
- (3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."
- (4) References should appear at the end of the paper. Example: [1] G. D. Hong, "Call for papers," *IEEE Trans. on Automatic Control*, AC-7, no. 1, pp. 100-105, January 1999. [2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999. [3] G. D. Hong, "A way to success," *Proc. of American Control Conference*, San Diego, pp. 106-110, June 1999.

Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 1 hard copy of journal only if the reprint charge (USD 100) is honored.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.
