

SPECIAL ISSUE ON ROBOTICS IN MEDICINE

Guest Editors: Doo Yong Lee (KAIST, Korea), Jaesoon Choi (Asan Medical Center, Korea)

An Automated Extracorporeal Knot-tying System Using Two Concentric Tube Robotic Arms for Deployment through a 3-mm Port

M. U. Farooq and S. Y. Ko 1

Analysis of Twist Deformation in Wire-driven Continuum Surgical Robot

D. Ji, T. H. Kang, S. Shim, and J. Hong 10

Three Dimensional Microrobot Tracking Using Learning-based System

J. P. Bae, S. Yoon, M. Vania, and D. Lee 21

Design and Clinical Test of a Passive Ultrasound Probe Holder Mechanism for Arterial Puncturing

M. U. A. Khan and B.-J. Yi 29

Design and Development of Light-weight Needle Control Device for Automated Tissue Sampling

Y. Moon, S. Park, J. Won, J. B. Seo, and J. Choi 38

Monitoring System for Diabetic Foot Ulceration Patients Using Robotic Palpation

W. Choi and B. Ahn 46

Manufacturing and Control of a Robotic Device for Time-averaged Simulated Micro and Partial Gravity of a Cell Culture Environment

Y. J. Kim, M. H. Lim, B. Jeon, D. H. Choi, H. Lee, A. J. Jeong, M. J. Kim, J. W. Park, J.-L. Ku, S.-Y. Jeong, S.-K. Ye, Y. Kim, and S. Kim 53

Medical Microrobot - A Drug Delivery Capsule Endoscope with Active Locomotion and Drug Release Mechanism: Proof of Concept

K. T. Nguyen, M. C. Hoang, E. Choi, B. Kang, J.-O. Park, and C.-S. Kim 65

Lyapunov Based Robust Control for Tracking Control of Lower Limb Rehabilitation Robot with Uncertainty

F. Qin, H. Zhao, S. Zhen, H. Sun, and Y. Zhang 76

Design, Modeling, and Evaluation of a Compact and Lightweight Needle End-effector with Simple Force-feedback Implementation for Robotic CT-guided Needle Interventions

K. Kim, H. Woo, J. H. Cho, and J. Suh 85

Characterization of Spastic Ankle Flexors Based on Viscoelastic Modeling for Accurate Diagnosis

W.-S. Shin, H. Chang, S. J. Kim, and J. Kim 102

A Study on Weight Support and Balance Control Method for Assisting Squat Movement with a Wearable Robot, Angel-suit

M. Jeong, H. Woo, and K. Kong 114

Adaptive Neural Network Fast Fractional Sliding Mode Control of a 7DOF Exoskeleton Robot

M. Rahmani and M. H. Rahman 124

Design and Test of Admittance Control with Inner Adaptive Robust Position Control for a Lower Limb Rehabilitation Robot

Z. Shen, Y. Zhuang, J. Zhou, J. Gao, and R. Song 134

Optimal Microneedle Design for Drug Delivery Based on Insertion Force Experiments with Variable Geometry

B. Ahn 143

Virtual Reality-based Control of Robotic Endoscope in Laparoscopic Surgery

Y. Jo, Y. J. Kim, M. Cho, C. Lee, M. Kim, H.-M. Moon, and S. Kim 150

Shape and Contact Force Estimation of Inserted Flexible Medical Device

H.-T. Ryu, J. Woo, B.-R. So, and B.-J. Yi 163

Medical Microrobot - Wireless Manipulation of a Drug Delivery Carrier through an External Ultrasonic Actuation: Preliminary Results

H.-S. Lee, G. Go, E. Choi, B. Kang, J.-O. Park, and C.-S. Kim 175

Utilization of 2N+I Units for 2-DOF Discrete Bending Joint to Transmit Perfect Axial Rotation for Laparoscopic Instruments

J. Suh 186

A Robotic Gait Training System with Stair-climbing Mode Based on a Unique Exoskeleton Structure with Active Foot Plates

E. Bae, S.-E. Park, Y. Moon, I. T. Chun, M. H. Chun, and J. Choi 196

REGULAR PAPERS

Real-time Depth Estimation Using Recurrent CNN with Sparse Depth Cues for SLAM System

S. J. Lee, H. Choi, and S. S. Hwang 206

Active Balancing Control for Unmanned Bicycle Using Scissored-pair Control Moment Gyroscope

S.-H. Park and S.-Y. Yi 217

3D Object Global Localization Using Particle Filter with Back Projectionbased Sampling on Saliency

A. Pirayawaraporn, N. Chindakham, J.-Y. Lee, and M.-H. Jeong 225

Optimal LQG Control for Networked Control Systems with Remote and Local Controllers

X. Liang, J. Xu, X. Lu, Q. Qi, H. Wang, and R. Gao 236

Model-free Optimal Tracking Control for an Aircraft Skin Inspection Robot with Constrained-input and Input Time-delay via Integral Reinforcement Learning

Information for Authors

International Journal of Control, Automation, and Systems

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

(1) *Regular Papers*: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.

(2) *Technical Notes and Correspondence*: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

(1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.

(2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.

(3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

Manuscript Style

(1) First page must contain:

- Title of paper, author(s), and affiliation(s);
- Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
- Keywords (at least four key words or phrases);
- Complete mailing address and e-mail address;
- Preferred address for correspondence and return of proofs; and,
- Footnotes (if desired) containing acknowledgement of financial or other support.

(2) Provide an introduction that includes a statement of the purpose and contribution of the paper.

(3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."

(4) References should appear at the end of the paper. Example: [1] G. D. Hong, "Call for papers," *IEEE Trans. on Automatic Control*, AC-7, no. 1, pp. 100-105, January 1999.

[2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999.

[3] G. D. Hong, "A way to success," *Proc. of American Control Conference*, San Diego, pp. 106-110, June 1999.

Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 1 hard copy of journal only if the reprint charge (USD 100) is honored.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.

CONTACT OFFICE : Institute of Control, Robotics and Systems, Suseo Hyundai-Ventureville 723, Bamgogae-ro 1-gil 10, Gangnam-gu, Seoul 06349, Korea. Tel: +82-2-6949-5806 Fax: +82-2-6949-5807, E-mail: journal@ijcas.com

Published by Institute of Control, Robotics and Systems and the Korean Institute of Electrical Engineers. Distributed by Springer. Printed by Dream Media. This journal is published monthly; on the first day of each month. This journal was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government (Ministry of Education). Subscription information is available at <http://www.ijcas.com> where full-text is available. It is printed on acid-free paper. Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
