REGULAR PAPERS

Control Theory and Applications

Investigation on Physical Meaning of Three-loop Autopilot
C.-H. Lee, S. He, and J.-H. Hong 2709

Observer-based Finite-time Model Reference Adaptive State Tracking Control with Actuator Saturation
Z. Wang, D. He, Q. Zhang, and J. Shu 2723

Optimum Design of Robust Adaptive Controller with Actuator Constraints
M. Noshad, H. Mirzaee, and A. Davoodi 2734

Formation Control Strategy for Underactuated Unmanned Surface Vehicles Subject to Unknown Dynamics and External Disturbances with Input Saturation
D. D. Mu, F. Wang, and Y. Sun 2742

Observer-based Time-varying Formation Tracking for One-sided Lipschitz Nonlinear Systems via Adaptive Protocol
C. Yan, W. Zhang, X. Li, and Y. Qian 2753

Leader-following Consensus of First-order Multi-agent Systems with Dynamic Hybrid Quantizer
H. Shi, M. Hou, J. Guo, Y. Wu, and D. Feng 2765

H. Control for Network TS Fuzzy Systems under Time Varying Delay for Multi-area Power Systems
M. S. Aslam and X. Dai 2774

Design of a Fuzzy Logic-based MPT Controller for a PV System Employing Sensors Control of PRAS-based PHM
A. M. O. Anwer, F. A. Omar, and A. A. Kalaka 2788

Event-triggered Finite-time Extended Dissipative Control for a Class of Switched Nonlinear Systems via the TS Fuzzy Model
H. Gao, H. Zhang, and J. Xia 2798

Robust Controller Design for Uncertain Linear Systems with Finite-frequency Specifications: A Polynomially Parameter-dependent Approach
Y. Ren, Q. L., D. W. Ding, W. Kang, and Y. Xiu 2808

On the Ultimate Uniform Bounded-stabilization for a Class of Perturbed Time Delay System via Sub-optimal Robust Control
Q. Song, M. Rainerii, C. Cano, L. Rodriguez-Guerra, H. Ramani, and P. Orduna 2818

Position Control of Robotic Manipulator Using Repetitive Control Based-on Inverse Frequency Response Design
B. Panomruttanarug 2830

Adaptive Event-triggered Control for Discrete-time Networked Control Systems with Actuator Faults and Nonlinearity
L. Zhang, M. Chen, T. Li, and H. Wang 2842

Event-triggered Stabilization of Linear Time-delay Systems by Static Output Feedback Control
X. Wang, P. Xiang, W. Hu, and T. Huang 2857

Event-triggered Control for Switched Affine Linear Systems
H. Hu, S. Huang, and Z. Zhang 2867

Maximum Likelihood Iterative Algorithm for Hammerstein Systems with Hard Nonlinearities
Y. Pu, Y. Yang, and J. Chen 2879

Adaptive Static Output Feedback Anti-disturbance Quantized Control for Nonlinear Systems with Multi-source Disturbances
Y. Zhou and H. Sun 2890

Aperiodic Sampled-data Control for Exponential Synchronization of Chaotic Delayed Neural Networks with Exponentially Decaying Gain
J. Wang, X. Huang, Z. Wang, X. Wu, and H. Shen 2898

Observer-based Adaptive Control for a Class of Uncertain Switched Systems with Time-delay: A Sliding Mode Approach
L. Lin, Z. Liu, Y. Xiu, and R. Xu 2907

Design of a Novel Boomerang Trajectory for Sliding Mode Controller
Kamleh AN, S. Natthottum and B. Chokkitinang 2917

Constraint-augmented Kalman Filter for Magnetometer-free 3D Joint Angle Determination
J. K. Lee, T. H. Jan, and W. C. Jung 2929

Robot and Applications

Analysis and Evaluation of Path Planning Algorithms for Autonomous Driving of Electromagnetically Actuated Microrobot
S. Lim, S. W. Sehn, H. Lee, D. Choi, E. Jang, M. Kim, J. Lee, and S. Park 2943

3D Localization of a Mobile Robot by Using Monte Carlo Algorithm and 2D Features of 3D Point Cloud
V. Rosas-Cervantes and G. C. Lee 2955

Design and Kinematic Modeling of a Notch Continuum Manipulator for Laryngeal Surgery
H. Wang, X. Wang, W. Yang, and Z. Du 2966

Development of a Shared Controller for Obstacle Avoidance in a Teleoperation System
J. Han, K. Choi, J. Ji, C. Ju, H. I. Son, and G.-H. Yang 2974

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of the Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:(1) Regular Papers: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form. (2) Technical Notes and Correspondence: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor’s decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to UCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the UCAS website at http://ijcas.com and following the instructions. Only PDF files is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

(1) Regular Papers: Manuscripts must be written in English and theTexsource file should be prepared in a LaTex format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typset in two-column and single-space structure; however the conversion process by the UCAS may result in 1 to 3 month delay in the printing process.
(2) Authors of an accepted manuscript will be provided to host the final version of their manuscript on the website http://ijcas.com.

(3) The preferred formats for graphics are TIFF, EPS, and JPEG formats. High-contrast line figures should be prepared with more than 300 dpi resolution, and color figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.
(4) Brief biographies and other clear glossy photographs of authors of TIF, EPS and JPEG files is included in the last page.

Manuscript Style

(1) First page must contain:
(a) Title of paper, author(s), and affiliation(s).
(b) Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes).
(c) Keywords (at least five key words or phrases).
(d) Complete mailing address and e-mail address.
(e) Preferred address for correspondence and return of proofs.
(f) Footnotes (if desired) containing acknowledgement of financial or other support.
(2) Provide an introduction that includes a statement of the purpose and contribution of the paper.
(3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., [KF is proven in [1)). Do not introduce another method.”

Copyright

It is the policy of the UCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the UCAS, its authors, and its subscribers; and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Authors who do not wish to fund the full cost of publication may apply to the charge is USD 100 per page for each page over the first 8.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, with the charge is $250 per page for each page over the first 8.
