REGULAR PAPERS

Control Theory and Applications

Backward Reachability Analysis for Nonlinear Dynamical Systems via Pseudospectral Method
M. H. Lee and J. Moon .......................... 575

Open Loop Robust Equilibria in Uncertain Discrete Time Games
F. G. Vélez, M. J. Lizárraga, and C. R. Carreon .......................... 587

New Robust Stability Criteria for Lu’s Systems with Time-varying Delays and Sector-bounded Nonlinearities
W. Duan, Y. L. J. Chen, and B. Du .................................................. 596

Stabilization of Enforced Positive Switched Linear Systems with Bounded Controls
J. Liu .......................................................... 607

Reliable H∞ Control on Stochastic Delayed Markovian Jump System with Asynchronous Jumped Actuator Failure
W. Luo, J. Yang, and X. Liu .......................................................... 618

Sampled-data Based Dissipativity Control of T-S Fuzzy Markovian Jump Systems under Actuator Saturation with Incomplete Transition Rates
T. Xu, J. Xia, X. Song, Z. Wang, and H. Zhang ................................ 632

Asynchronous Control for Positive Markov Jump Systems
K. Yin, D. Yang, J. Liu, and H. Li ..................................................... 646

Observer-based Finite-time Control of Stochastic Non-strict-feedback Nonlinear Systems
Y. Zhang and F. Wang .......................................................... 655

Input-to-state Stability of Impulsive Stochastic Nonlinear Systems Driven by G-Brownian Motion
L. Pan and J. Cao ...................................................... 666

Fractional-order Sliding Mode Constraint Control for Manipulator Systems Using Grey Wolf and Whale Optimization Algorithms
S. I. R. Hossain .................................................. 676

An Adaptive Neural Sliding Mode Control with ESO for Uncertain Nonlinear Systems
J. Wang, P. Zhu, B. He, G. Deng, C. Zhang, and X. Huang .......................... 687

Generic Adaptive Sliding Mode Control for a Quadrotor UAV System Subject to Severe Parametric Uncertainties and Fully Unknown External Disturbance
T. Huang, D. Huang, Z. Wang, X. Duo, and A. Shi ................................ 698

Improved Function Augmented Sliding Mode Control of Uncertain Nonlinear Systems with Preassigned Settling Time
G. Cai, X. Li, M. Hsu, G. Duan, and J. Huo .................................. 712

Immersion and Invariance-based Sliding Mode Attitude Control of Tilt-Tri-rotor UAV in Helicopter Mode
L. Zhang, J. Liu, Z. Zhao, X. Wang, and L. Shi .................................. 722

Robust Distributed Cooperative Controller for DC Microgrids with Heterogeneous Sources
J. Lee and J. Bae .......................................................... 736

Frequency Criterion of Robust Modality for the Class of Linear Systems with Time-delays
J. A. Rubén and T. G. Aburto .......................................................... 745

Back-stepping Robust Control for Flexible Air-breathing Hypersonic Vehicle via a-filter-based Uncertainty and Disturbance Estimator
Y. Yang, X. Shen, Y. Shi, and W. Zhang ........................................ 753

Chattering-free Fault-tolerant Attitude Control with Fast Fixed-time Convergence for Flexible Spacecraft
S. M. Esmaeili, M. Gabardo, and T. Mahyari .......................................................... 767

Robust Optimal PID type LQG for Linear Batch Process
X. Wang and C. Shen .......................................................... 777

Robust Boundary Vibration Control of Uncertain Flexible Robot Manipulator with Spatiotemporally-varying Disturbance and Boundary Disturbance
M. A. Eshaghi, L. Ma, Y. Sun, and L. Zhang ........................................... 788

Robust Actuator Fault Reconstruction for Takagi-Sugeno Fuzzy Systems with Time-varying Delays via a Synthesized Learning and Luenberger Observer
Q. Jin, L. Wu, and H. Li ................................................................ 799

The Decoupled Active/Reactive Power Predictive Control of Quasi-Z-Source Inverter for Distributed Generations
D. Ali, K. Cheng, R. Wang, J. Sun and X. Xia ........................................ 810

Distributed Cooperative Path Planning for Tracking Ground Moving Target by Multiple Fixed-wing UAVs via DMPC-GVD in Urban Environment
C. Hu, Z. Meng, G. Qu, H. Shi, and A. Tahraoui ........................................ 823

Distributed Fixed-time Formation-containment Control for Multiple Euler-Lagrange Systems with Directed Graphs
M. Naz H. Ding, X. Y. Yao, and X. Zhang ........................................... 837

Model-based, Distributed, and Cooperative Control of Planar Serial-link Manipulators
S. Sumya and K. R. Gopalswamy ........................................... 850

Adaptive Interconnection and Damping Assignment Passivity Based Control for Undeactuated Mechanical Systems
M. Rybak, D. S. Kalas, and H. M. Tseng ............................................. 864

Plexing Synchronization of Complex Dynamical Networks on Time Scales
F. D. Kong and J. P. Sun .......................................................... 878

(Continued on inside back cover)
