

REGULAR PAPERS

Control Theory and Applications

Flocking of Multi-agent Systems with Unknown Nonlinear Dynamics and Heterogeneous Virtual Leader

T. Yan, X. Xu, Z. Li, and E. Li 2931

Event-trigger Optimal Consensus for Multi-agent System Subject to Differential Privacy

T. Dong, H. Zhu, and W. Hu 2940

Adaptive Event-triggered Control for Stochastic Nonlinear Multi-agent Systems with Unknown Control Directions

J. Zhang, C.-E. Ren, and Q. Fu 2950

Trajectory Tracking Control of Multi-DOF Robot without Considering System Dynamics

S. J. Abbasi, H. Khan, and M. C. Lee 2959

Guaranteed Cost Optimal Control of High-speed Train with Time-delay in Cruise Phase

X. Tian, D. Huang, N. Qin, Z. Gong, and Q. Wang 2971

Research on Action Strategies and Simulations of DRL and MCTS-based Intelligent Round Game

Y. Sun, B. Yuan, Y. Zhang, W. Zheng, Q. Xia, B. Tang, and X. Zhou 2984

Finite-time Stability and Stabilization of Markovian Jump Linear Systems Subject to Incomplete Transition Descriptions

Y. Bai, H.-J. Sun, and A.-G. Wu 2999

Complete 3D Foot Scanning System Using 360 Degree Rotational and Translational Laser Triangulation Sensors

J. Lee, M. Lee, and S.-Y. Park 3013

Finite-time Stable Robust Sliding Mode Dynamic Control for Parallel Robots

M. Ye, G. Gao, and J. Zhong 3026

Semi-global Adaptive Bipartite Output Consensus of Multi-agent Systems Subject to Input Saturation and External Disturbance Under Switching Network

H. Xu, H. Su, Q. Wang, and C. Xu 3037

FHOSM Tolerant Control for Networked Control Systems with Disturbances and Faults

G. Mahmoud, Y. Chen, L. Zhang, and M. Li 3049

A Nonlinear H_∞ Set-point Control Method for Turbofan Engines with Disturbances

D. Cheng, L. Liu, and Z. Yu 3062

Actuator and Sensor Fault Detection and Isolation for Uncertain Switched Nonlinear System Based on Sliding Mode Observers

F. Zhu, Y. Shan, and Y. Tang 3075

Quasi-synchronization of Hybrid Coupled Reaction-diffusion Neural Networks with Parameter Mismatches via Time-space Sampled-data Control

X. Li, X. Song, Z. Ning, and J. Lu 3087

Event-triggered Output-feedback Control for Networked Switched Positive Systems with Asynchronous Switching

J. Liu, Y. Yang, H. Li, and Y. Geng 3101

Consensus Based Parallel Operation of Electric Motors Ensuring Speed Regulation and Load Torque Sharing

H.-J. Lee, Y.-H. Lim, and K.-K. Oh 3111

Brain Emotional Learning and Adaptive Model Predictive Controller for Induction Motor Drive: A New Cascaded Vector Control Topology

M. Affan and R. Uddin 3122

Observer-based Non-fragile Mixed Passivity and H_∞ Feedback Control for Fuzzy Stochastic Jump System Subject to Quantized Measurements

K. Ma, G. Zhuang, J. Xia, G. Chen, and H. Zhang 3136

Reliability Analysis of Networked Control Systems with the Consideration of Operating Frequency

M. Guo and R. Li 3150

Stability Analysis for Time-delay Systems via a Novel Negative Condition of the Quadratic Polynomial Function

Y. Chen and Y. Li 3159

Robust Adaptive Finite-time Fault-tolerant Control for Dynamic Positioning of Vessels

Y. Lin, J. Du, and J. Li 3168

Robot and Applications

Realtime Object-aware Monocular Depth Estimation in Onboard Systems

S. Lee, C. Lee, H. Kim, and H. J. Kim 3179

Modeling and Control of Hybrid-driven Gliding Motion for an Underwater Gliding Snake-like Robot

J. Tang, J. Chang, B. Li, and A. Zhang 3190

High-precision Underwater 3D Mapping Using Imaging Sonar for Navigation of Autonomous Underwater Vehicle

B. Kim, H. Joe, and S.-C. Yu 3199

A New Model-free Robust Adaptive Control of Cable-driven Robots

Y. Wang, L. Liu, M. Yuan, Q. Di, B. Chen, and H. Wu 3209

Intelligent Control and Applications

Neural Network Based Visual Servo Control Under the Condition of Heavy Loading

S. Tong, K. Zhang, H. Shi, J. Zhao, and J. Sun 3223

NN-based Prediction Interval for Nonlinear Processes Controller

M. A. Hosen, A. Khosravi, H. M. D. Kabir, M. Johnstone, D. Creighton, S. Nahavandi, and P. Shi 3239

Information for Authors

International Journal of Control, Automation, and Systems

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

- (1) *Regular Papers*: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.
- (2) *Technical Notes and Correspondence*: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor’s decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at http://ijcas.com and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

- (1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.
- (2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website http://ijcas.com.

- (3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.
- (4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

Manuscript Style

- (1) First page must contain:
 - a) Title of paper, author(s), and affiliation(s);
 - b) Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
 - c) Keywords (at least four key words or phrases);
 - d) Complete mailing address and e-mail address;
 - e) Preferred address for correspondence and return of proofs; and,
 - f) Footnotes (if desired) containing acknowledgement of financial or other support.

(2) Provide an introduction that includes a statement of the purpose and contribution of the paper.

(3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., “KF is proven in [1]. Dorf [2] introduced another method.”

(4) References should appear at the end of the paper. Example: [1] G. D. Hong, “Call for papers,” *IEEE Trans. on Automatic Control*, AC-7, no. 1, pp. 100-105, January 1999.

[2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999.

[3] G. D. Hong, “A way to success,” *Proc. of American Control Conference*, San Diego, pp. 106-110, June 1999.

Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 1 hard copy of journal only if the reprint charge (USD 100) is honored.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.
